

COMMUNIQUÉ

PATENT WORKSHOPS: TWO DAYS DEDICATED TO DAY-TO-DAY ISSUES OF PATENT PROFESSIONALS

| 21/06/18 |

Grégoire Desrousseaux and François Pochart, partners, and their team of European representatives and lawyers, are happy to announce the launching of the first annual session of the Patent Workshops, which are taking place on June 21 and 22, 2018, at the August Debouzy law firm.

Two days of training to address all the practical solutions to patent professionals' day-to-day problems, whether involving rights acquisition procedures or litigation (EPO and French litigation). Other legal specialists will come to provide their perspectives and to extend the discussion to subjects on the margins of patent law, but which are also essential to understanding the challenges for professionals.

"French companies have continued to capitalize on their creativity despite strong international competition. In order to protect patents and by taking into account legal uncertainty, we would like to propose a protection strategy to companies which takes into account the most recent developments of the relevant courts in this field", according to Grégoire Desrousseaux and François Pochart, partners at August Debouzy.
