## AUGUST DEBOUZY ASSISTS ALSID IN ITS SALE TO TENABLE GROUP

| 16/02/21 | Vincent Brenot Florence Chafiol Philippe Lorentz Julien Wagmann Thibaut Amourette Diane Reboursier Elie Bétard François Richard Guillaume Potin Alexandra Berg-Moussa

August Debouzy assisted Alsid, a specialist in the Active Directory security market, in its sale to Tenable Holdings, Inc., a specialist in Cyber Exposure, it being specified that the transaction remains subject to obtaining the applicable regulatory approvals.

Alsid offers a *Software as a Service* (SaaS) solution with an on premise deployment option that monitors Active Directory security in real time. Its solution enables users to find and correct existing cyber vulnerabilities through real time threat assessment and detection.

The acquisition of Alsid will enable Tenable to manage the exploitation and abuse of user privileges, a favorite tactic of hackers, via Active Directory. Tenable and Alsid are joining forces to provide users with a more holistic view of risk and a more comprehensive approach to cyber preparedness.

Emmanuel Gras and Luc Delsalle, founders of Alsid, will join Tenable's management team and continue to develop innovative Active Directory security solutions and favor expansion into new international markets.

The acquisition of Alsid, based on a total purchase price of \$98 million, is expected to close early in the second quarter of 2021.

Alsid is one of the companies that have benefited in the past from August Debouzy's "Start You Up" legal support program implemented in 2013, which allows many promising start ups to access all areas of the law following a competition.
