## PUBLIC CONSULTATION ON IMPLEMENTATION OF THE DSA

European Law | 21/02/23 |

The Digital Services Act (DSA) empowers the Commission to adopt implementing acts detailing arrangements on issues identified in Article 83 of the regulation on the investigatory and enforcement powers of the Commission. To this end, the European Commission opened, on February 17th, 2023, a public consultation on DSA enforcement procedures (here).

Governments, NGOs, companies and private individuals have **until March 16th** to share their views on the draft implementing act setting out detailed rules on how Commission officials will inspect the premises and have access to the data and algorithms of companies reaching more than 45 million users in the EU to ensure that they comply with rules designed to limit the distribution of illegal and harmful content on the Internet.
