

COMMUNIQUÉ

AUGUST DEBOUZY ADVISED AVENTA IN CONNECTION WITH ITS FUNDRAISING FROM NEXTSTAGE AM

August Debouzy | 17/04/23 | Philippe Lorentz Julien Wagmann Elie Bétard Coralie Foucault Alexandre Dumortier

August Debouzy advised Aventa, one of the European leaders in consulting and engineering services dedicated to the fast-growing global market of Marine Renewable Energy (MRE), in connection with its fundraising of approximately €10 million from the investment fund NextStage AM.

Founded in 2010 by two engineers, Antoine Bosc and Aurélien Zuccarini, Aventa has developed strong expertise in engineering and consulting services for complex offshore projects, with a specialization in submarine cables. Aventa is particularly active in offshore wind energy and contributes to the development of new marine innovations such as floating wind energy, green hydrogen and energy storage.

This fundraising will allow Aventa to pursue its development as it aims to establish itself as a major player in the MRE sector by contributing to its structure and federating the key skills of the Blue Economy ecosystem.

August Debouzy advised Aventa with Julien Wagmann (partner), and Coralie Foucault (senior associate), from the corporate department.

The other teams of the firm were composed of:

Philippe Lorentz (partner) and Elie Bétard (counsel), on tax law aspects; and
Alexandre Dumortier (senior associate), on employment law aspects.
