AUGUST DEBOUZY ADVISED MERIDIAM ON ITS INVESTMENT OF €57M IN EVERGAZ, SPECIALIZING IN THE PRODUCTION OF BIOGAS

Private Equity | 07/01/25 | Julien Wagmann Maxime Legourd François Richard

Meridiam has joined, as main investor, a funding round of Evergaz, a major player in the development and operation of anaerobic digestion units, for a total amount of €60M. This transaction, enabling Meridiam to take control of Evergaz, was conducted alongside Swen Capital Partners, which retains a minority stake, and Eiffel Investment Group and Bpifrance, which acquire a stake in the company.

This investment will enable Evergaz to strengthen its position in the energy transition market in France and Europe by accelerating the development of biomethane projects and consolidating its portfolio of existing anaerobic digestion units.

August Debouzy's team was composed of Julien Wagmann (partner), Maxime Legourd and François Richard (senior associates).
