August Debouzy advises 9e Art+ in connection with its dispute with several local public stakeholders regarding the conditions for organizing The International Comic Strip Festival in Angoulême (FIBD). This sensitive matter raises significant issues, including the continuity of an internationally renowned event and the economic and operational impact on both the professionals involved and the region.

Our attorneys in the Public, Regulatory, and Environmental Department, Vincent Brenot, partner, and Ghislain Minaire, counsel, are working with the goal of achieving a solution that complies with the law and honors the Festival's history.
